ROTAX ACE™ 4-STROKE ENGINES

With the Advanced Combustion Efficiency (ACE) family of engines, BRP engineers optimized the combustion system, reduced mechanical friction, and freed intake and exhaust breathing. The result is the most efficient engines in snowmobiling. Not only are they efficient, they're a pleasure to operate and own. Very little maintenance is required; they run smoothly and produce a nice, solid – yet quiet – sound.

900 ACE TURBO R

ACE engines are the best-selling 4-stroke engines in snowmobiling.[4]

INTELLIGENT THROTTLE CONTROL

Standard on the ACE engines, the iTC™ system delivers a whole different snowmobiling experience.

- **Driving Modes:** A button on the console enables you to select one of three driving modes. Standard mode ensures a smooth start and linear acceleration; Sport enables full performance and quicker acceleration; ECO® limits top speed and acceleration rates for a more relaxed, fuel-conserving ride.
- **Finger Throttle** (only on 600 ACE and 900 ACE engines without Turbo): The throttle block can be rotate forward for use as a finger throttle, if preferred. Great for changing hand positions on a long ride and for more control through bumps.

1 Observed metric horsepower based on internal dyno test performed in optimal conditions.
2 Data based on internal engineering trail testing.
3 Data based on internal engineering trail testing in ECO mode.
4 Based on retail sale results as of December 31, 2019.

HOW TO CHOOSE LENS COLORS?

On brighter days, a darker or mirror lens will help to protect your eyes more from the harsh reflections of the sun on the snow. Flat light conditions require a lens that will allow more light through so you can use all the available light to your advantage. Medium tint lenses are made to be adaptable to a variety of conditions. Lightly tinted lenses allows as much light in as possible and provides you with enhanced contrast throughout those darker days and snowfall. Clear lenses also for snowfall and dark conditions.

All Radien lenses are UV (UVA/UVB) protected.

MADE IN FINLAND

Svala & Lynx have over 120 years of combined expertise on Nordic winters.

Svala's story began in the 1940s, with the determined women of Kärsämäki, Finland, transforming old army coats into work clothes. Svala's uncompromising R&D work has led to high-quality products on which professionals like cold work specialists rely today.

The first Lynx snowmobile was introduced for winter 1968–1969, developing over decades into a world-wide brand loved by riders on both sides of the Atlantic. Lynx is famous for technical solutions for demanding Nordic conditions – in snowmobiles, but also in equipping the riders to stay comfortable in all winter activities.

THE LYNX X SVALA PRODUCTS are designed and manufactured to keep you warm and comfortable in even the most demanding conditions.

Collaboration highlights Lynx premium layering principles and importance of wearing layers starting from next to skin to perfect mid layers and Balaclavas.
